

OUR 2030 PLEDGE

We recognise the precipice at which we find ourselves and the urgent need to commit to making change to secure the future of our planet and the human race.

We recognise that we need to continually evolve the way we do business and the way in which we behave as individuals.

This is not easy, particularly in the events industry, but it starts with an intention to be better.

Educating our community

Our community consists of our employees, clients, suppliers, partners and our local area. We are committed to educating our community in how they can each take steps towards a sustainable future as a partner to Event Concept and as individuals.

Partnering with our clients

We are always asking ourselves 'What's Next?' and as part of our Pledge we are committed to partnering with our clients to find sustainable solutions. Sustainability doesn't have to equal boring, using creative thinking and new technologies we partner with our clients to deliver #ImpactWithoutImpact. .

Reducing our footprint

We commit to reducing the footprint we leave as an organisation on the world around us.

By 2030 we are aiming to:

- be zero to landfill
- achieve NetZero, and
- remove all single use plastic from our manufacturing process and facility.

We hope, as a partner you will support us in playing your role in helping us to achieve this.
